

VOLVO V60

www.volvocars.com

V60

This is a luxury car by any measure, and one that promises more than rewarding comfort and class-leading style. This is a luxury car that's smarter and stronger in all the right places, for all the right reasons: you. This is your Volvo V60.

The workhorse gets wicked.

Like every example of change, it started with an idea. A spark that ignited imaginations, setting in motion an irreversible, irresistible chain of events. In this case, the idea was simple – create the world's sportiest, sexiest, most dynamic Sportswagon.

A million pulse-quickening moments later, it's here. We call it the V60, but you'd be excused for using more emotional language. An enabling, revolutionary, unexpected, exuberant, intense, enchanting, poised, sophisticated and raw modern Scandinavian classic, perhaps? Call it what you like, but one thing is certain – you'll never call it ordinary.

From this day on...

You will refuse to compromise. You will avoid the default solution. You will demand more excellence. You will see more beauty. You will measure what is best with raised parameters. You will view normality on revised terms. You will allow your emotions to steer you onto new, exciting roads.

Now imagine an open road. Perfect driving conditions. A corner approaches. A smile plays on your lips. Our new improved Dynamic Stability Traction Control has that effect. Adrenaline surges, instinct kicks in – and Corner Traction Control has your back. A slight punch of the accelerator to take you out of the curve is echoed by a small, almost imperceptible skip of your heartbeat. Was that the Four-C semi-active chassis and Advanced Stability Control you just felt? Perhaps. But there's no time to dwell on that because you just felt an infinitely more powerful emotion – the promise of a world of possibilities ahead.

Blow the doors off, thoughtfully.

Our engine programme is built on some strong foundations. Over 80 years of knowledge and experience. Environmental compassion and consideration. And last but definitely not least, innovation, excitement and dynamism. The result? Under the bonnet of your V60 you can drop in an engine that's among the most advanced and forward-thinking in the automotive world.

Choose from four turbocharged petrol and five diesel powertrains from a lean 115 hp to a pumped-up 304 hp. Enjoy the guilt-free exhilaration of experiencing 215 hp while emitting only 120 g CO₂/km with the refined D5 turbodiesel. Complement with one of a range of dynamic manual and automatic gearboxes including Powershift transmission or the superb performance of AWD with selected models. However you configure yours, we're confident you'll enjoy a drive that makes you feel good, without feeling bad.

CO₂ 119 g/km.
(If you don't smoke the tyres.)

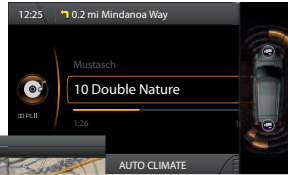

Low emissions. High torque. Pure fun. The new refined 136 hp D3 Start/Stop delivers it all. Innovative technology and intelligent design make the most of a fine-tuned 2.0 litre five-cylinder turbodiesel that uses barely 4.5 litres of fuel every 100 kilometres. What's more, already from low revs you've got access to 350 Nm of feel-good torque. Quick, sure power. Smart, fuel savings. This is eco-driving with a twist. Personal settings

Man and machine. The conflict is over.

Getting the most out of every kilometre you drive involves many different factors. It could be argued that the most defining of these is your relationship with your car. Through the application of smart design we've created what we believe is one of the world's most agreeable, functional and comfortable driving environments: seats that support, caress and can be finely adjusted to suit the most demanding of drivers; a three-spoke steering wheel that exudes sporty confidence; a centre console angled slightly towards the driver for easy access to key functionality; materials chosen for their high quality, allergy-reducing characteristics and ultimate recyclability; ambient cabin lighting that sets a mood of sophistication and more. The details are as endless as are the possibilities. Thankfully, the new driver-control interface helps you manage your options.

This intuitive computer command system uses the built-in screen and a scroll wheel selector on the steering wheel to make it easy to personalise settings and get the most from all of your on-board technology. Information, entertainment, functionality are easily accessible, easily enjoyed and easily controlled. For man and machine, the conflict is over.

To learn more about Volvo's Sensus technology, please visit www.volvocars.com

Innovative safety from the people who wrote the book.

Your eyes and your instinct tell you this is not just another Volvo. You're right – and you're wrong. Underneath the automotive world's newest, sexiest curves, you'll find some reassuringly familiar characteristics in their very latest form. Volvo characteristics, such as safety and innovation, for example. Or rather, innovative safety, an area we've pioneered for over 80 years.

Take our Driver Support Package. It includes a comprehensive range of equipment including Adaptive Cruise Control (at all speeds), Collision Warning with Full Auto Brake and Pedestrian Detection, Blind Spot Information System, Road Sign Information, Active High Beam, Lane Departure Warning and the reassuring backup of a Driver Alert System. Devised to make roads safer for everyone, every one of these features has been created in the true Volvo tradition in so much as you won't even realise they're there until you need them. To see this supportive technology in action, please visit **www.volvocars.com**

Safe? Definitely. Innovative? Absolutely. Part of your V60? Naturally.

Avoid what you love most.

The V60 loves people. It welcomes them, embraces them, protects them, entertains them and exhilarates them. It also enables you to avoid them. How come? Well, we've created a smart new feature we call Pedestrian Detection with Full Auto Brake. As the name suggests, it detects pedestrians as you drive at speeds up to 35 km/h and if a potential hazard is detected, the brakes are automatically applied. To put it in more human terms, you can think of it as several extra pairs of permanently alert eyes.

Of course, we would never suggest that any function can replace safe driving, but by utilising our unique experience of innovative safety, you can now drive a car that literally takes safety onto the streets.

Relax. It thinks as fast as it moves.

An open road. You're behind the wheel of what is arguably the world's most dynamic Sportswagon. It doesn't get better than that, does it? Well, yes it does, because in the V60 you're also behind the wheel of a car that can see and think in remarkable ways. Take the Adaptive Cruise Control (at all speeds) feature, for example. It supports automatic cruising at speeds up to 200 km/h, ensuring your speed automatically adjusts to maintain a safe distance to cars in front. Should you find yourself in a situation where a collision is imminent, you'll receive a visual warning and if by chance you miss this, braking occurs automatically. We call it Collision Warning with Full Autobrake. We also call it simple – because the best ideas usually are.

City Safety. Mastering the unexpected with laser precision.

Always expect the unexpected – nowhere is this more evident than in urban traffic. That's why the advanced low-speed collision avoidance system City Safety comes as standard in your Volvo V60. Utilising laser technology and active up to 50 km/h, this high-precision system keeps a lookout on the road 6–8 metres ahead. If a vehicle suddenly brakes in front of you and a collision is imminent, City Safety will intervene and brake automatically to help avoid or mitigate a collision. Very courteous in slow-moving city traffic – for you, your passengers, your insurance company and anyone in the car in front of you. Almost like a sixth sense tuned into the city. Sounds like simple common sense to us – which perhaps explains why you'll find it in a Volvo.

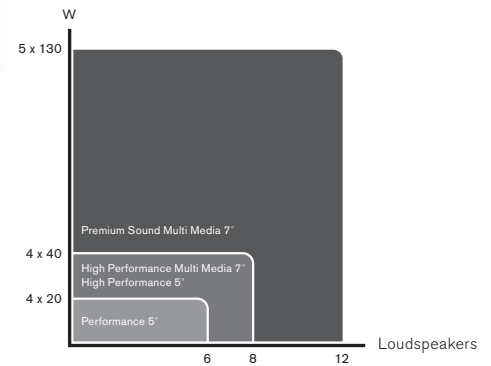

Look left. Look right. Now try both at the same time.

They say that you never know what's around the corner. At Volvo, we don't agree – and we present the front blind view camera which you can add to your V60 as our evidence. Mounted in the front grille, this camera sends a split-screen image of the 180-degree view in front of the car to the dashboard-mounted screen. It is designed to assist when pulling out into blind crossings, leaving tight parking spaces or managing any other driving dilemma that could benefit from an extra pair of eyes – or two. Complement with a rear-mounted camera and this innovative feature takes safety into new territory. Or if you prefer, just around the corner.

Front row seats or back stage passes. The choice is yours.

From our entry-level system all the way up, we made it our ambition to ensure you and your passengers enjoy superior entertainment. At the top of the range, you'll find our Premium Sound Multi Media system. Close your eyes and hear the difference Dolby® Pro Logic® II surround sound, twelve strategically placed speakers and MultEQ room reading technology make. Open them and see how a DVD player, a 7" in-dash colour screen and optional Rear Seat Entertainment screens can transform a drive into an event. Interact with it through standard USB/iPod® interface or wirelessly with Bluetooth®. Fully controllable from the steering wheel, this system delivers an experience that's as close to being there as it gets.

The more you put in, the more you get out.

Why limit adventures to the weekend? And why limit your adventures through your choice of car? After all, enjoying life to the max is all about making the most of our capacity. Speaking of which, check out the spacious luggage area on the V60 Sportswagon. Its split 40/20/40 rear seat makes transporting longer items simple without intruding on the wellbeing of your passengers. Good news for golfers and skiers among countless others. Other smart features include a lockable load floor, cargo divider and integrated two-step booster seats. Perfect should you have curious, junior VIP passengers on-board.

Style and driving pleasure, uncompromised by functionality. When it comes to what you do in yours, the V60 is a blank page – your story starts here.

A show of strength.

The V60 enjoys nothing more than the attention and company of loving people. But be reassured. When it comes to protecting you, your belongings and your passengers, it isn't afraid to show its teeth.

Personal security enhancements such as Volvo On Call automatic assistance, Approach and Home Safe Lighting and the Personal Car Communicator (PCC) all make sure that you know Volvo safety is at work even when your car is at rest. With the PCC fob, you can check the status of your car from a distance, open locked doors automatically when you grab the handle, and start the car with keyless convenience – just have the fob in your pocket or handbag. Adding the new generation Volvo On Call telematics technology gives you access to a range of smart services for your convenience and security. For example, using your smartphone you can remotely control some functions of your car – like locking and unlocking the doors, starting the fuel heater and locating your parked car. What's more, your car can be traced via satellite if stolen. And in case of an emergency, you're instantly connected to the Volvo On Call operator who can see your location and send assistance.

It doesn't have to be complicated. Stress disappears, fun begins. Luxury car drivers simply expect perfection – with exhilaration on demand and personalisation in every detail. The magic of introducing ingenuity without complication, durability without boredom and luxury without superficiality is distinctively and proudly, a Volvo tradition.

We build cars designed around you.

Innovated for your enjoyment, Volvo safety technologies will protect more than the fun of driving.

Across the world Volvo is synonymous with advanced safety technology. And with good reason, because few car makers can match our record of safety innovations and the commitment to safety that has guided us for more than 80 years. Of course, this makes us extremely proud. But we're not satisfied. Because we know what we want to achieve: zero accidents. This huge task calls for innovative thinking and a brand-new approach to the way we design cars. The good news

is that we've already come a long way. For starters, our cars are more fun and engaging to drive than ever. And the technology needed is no figment of the imagination – some is already available in your Volvo. This means driving a Volvo today is like having a first peek at a very exciting automotive future – a future where passionate engineering and design do more to empower you as driver.

Eyes in the back.

Park assist and park assist camera let you know what's going on behind your car when reversing. This feature is also available for the front.

Tow in harmony.

When towing, Trailer Stability Assist (TSA) helps counteract snaking tendencies from a trailer.

All-road stability.

Volvo's All-Wheel Drive (AWD) with Instant Traction™ enhances driving stability and traction in all weathers, in all seasons and on all roads.

24/7 peace of mind.

Stay cool. Volvo On Call is Volvo's integrated emergency and roadside assistance technology.

Personal gatekeeping.

Inspired by fighter aircraft technology, the Intelligent Driver Information System (IDIS) can help reduce your workload in stressful situations.

Stay on track.

Dynamic Stability and Traction Control (DSTC) improves handling, safety and fun in a wide range of challenging situations.

Low-speed collision avoidance.

City Safety – the world's first standard-fitted collision avoidance and mitigation technology – brakes your car automatically if you're about to run into a slower moving or stationary vehicle at speeds up to 50 km/h.

See around corners.

When parking or exiting a narrow lane, front blind view camera helps you discover what's approaching from the right and the left.

On-road enlightenment.

Active Bending Lights (ABL) with Dual Xenon technology expands your vision range when driving in the dark and provides considerably improved illumination around bends.

Smooth cruising at any speed.

Adaptive Cruise Control (at all speeds) automatically maintains your set speed and distance to the vehicle ahead of you – whether you're driving on the motorway or in slow-moving stop-and-go traffic. Included in the Driver Support Package.

Collision avoidance at all speeds.

Collision Warning with Full Auto Brake (CWFAB) warns you if you're too close to the vehicle in front – at all speeds – and brakes the car automatically if a collision is imminent. Included in the Driver Support Package.

Pedestrian detection.

Using radar and camera technology, Pedestrian Detection with Full Auto Brake can detect pedestrians in front of your car and brake automatically if needed – a Volvo world first. Included in the Driver Support Package.

Position control.

Lane Departure Warning (LDW) warns you if you drift out of lane. Included in the Driver Support Package.

Staying alert.

Driver Alert Control (DAC) alerts you if your driving behaviour shows signs of drowsiness or distraction and suggests a break. Included in the Driver Support Package.

An eye on the blind spot.

The Blind Spot Information System (BLIS) helps you detect vehicles entering your blind spot. Included in the Driver Support Package.

Designed to catch the light brilliantly, this car also reflects a promise.

Our journey towards a better environment started back in the early 70s. Then we were among the first car makers to acknowledge the environmental downside of cars and to do something about it. Since then we have been constantly innovating to reduce the environmental impact of our cars – all the way from product development and manufacturing to driving and recycling.

One of our biggest challenges is to reduce CO₂ emissions, which contribute to climate change. Our response is the technology and innovations developed within our Drive-E program. For example, today we offer one of the premium segment's strongest ranges of low CO₂ alternatives. And consistently utilising

innovative powertrain technology together with advanced aerodynamics, low friction technology and lightweight materials, Drive-E is an important step towards zero emissions.

We are introducing new technology such as plug-in hybrid vehicles that will further reduce CO₂ emissions and can be charged from a standard wall socket. And we're heavily engaged in the development of electric vehicles – a technology that will dramatically reduce the environmental footprint of our cars and make them even more fun to drive. Fact is, we have already launched our first electric car – the Volvo C30 Electric – and more exciting news is on the way.

Bioethanol for lower fossil CO₂ emissions.

Running on E85 bioethanol in a T4F Flexifuel, you can significantly cut your greenhouse gas emissions. Because bioethanol is a renewable fuel, the carbon dioxide emissions from combustion are already part of the ecosystem and won't contribute to greenhouse gas levels in the atmosphere.

Clean colours.

To reduce use of environmentally hazardous solvents, all Volvo exterior colours are water-based. What's more, our painting facilities are among the cleanest in the world.

Green at the red lights.

To further reduce fuel consumption and CO₂ emissions by up to 8% when driving in town, all the turbodiesels and the new direct injection 1.6-litre petrol engines with manual transmission come with Volvo's Start/Stop technology.

Cleaner exhaust.

Fast responding after a cold start, Volvo's advanced emission control eliminates between 95 and 99% of carbon monoxide, hydrocarbons and nitrogen oxides from petrol engine exhaust gases. Volvo turbodiesels feature a particulate filter that removes about 95% of the particles from the diesel exhaust gases.

Healthier interior materials.

All our upholstery and interior textiles are tested for specific allergy-inducing or harmful substances. And several interior metal parts are tested with regard to contact allergies. Good for you, and for anyone who shares your ride.

Allergy-approved interior.

Clean Zone Interior Package (CZIP) provides cabin air that is so clean it is recommended by the Swedish Asthma and Allergy Association.

From 119 g CO₂ per km.

Our most eco-progressive engine alternatives, the CO₂ optimised D2, D3, D4 and D5 turbodiesels with Start/Stop and manual transmission, satisfy themselves with only 4.5–4.6 litres of fuel per 100 km – for minimum emissions and maximum style.

Brake for energy.

Every time you brake, the battery is fed with extra power. Smart and fuel-saving.

Fresh cabin air.

Continuously monitoring the incoming air and shutting out carbon monoxide, ground-level ozone and nitrogen dioxide, Volvo's Interior Air Quality System helps ensure that the air you breathe in the car is cleaner than the air outside when driving in heavy city traffic.

Minimum drag.

Born in our state-of-the-art wind tunnel, the V60 cuts flawlessly through the air. For example, flat underbody panels allow the air to flow more freely and contribute to lower fuel consumption.

85% recyclable.

To help minimise its total environmental impact, every Volvo is designed to facilitate recovery and recycling at the end of its useful life.

Fuel-saving design.

To reduce energy loss from air and rolling resistance, we utilise advanced aerodynamic design, lightweight materials and low friction technology. Together with state-of-the-art engine technology, this lowers your CO₂ emissions and helps you travel further on less fuel.

Maximised fuel efficiency with diesel.

Volvo's advanced common-rail turbodiesel technology ensures superior fuel economy and low CO₂ emissions, as in the high-performance turbodiesel D5.

Your Volvo V60 starts here.

The engine you choose will define a major part of the experience ahead. Some engines favour high performance, while others favour high mileage, but all of these petrol and diesel engines deliver instant power and smooth running while state-of-the-art technology makes the most of every micro-drop of fuel. Which engine is going to start you up? Find out more about the engines at www.volvocars.com

T5

186 CO₂ g/km | **8.0** l/100 km | **240** hp | **177** kW | **320** Nm | **Euro 5**

For the petrol head inside you, we loaded this new generation petrol turbo engine with the very latest technology. High precision direct-fuel injection together with Volvo's patented turbocharger and variable camshafts give this four-cylinder 2.0-litre power plant the powerful characteristics of a larger engine – without its high fuel consumption. You can enjoy instant acceleration, more responsive handling and a relaxed driving experience in all driving situations. Other fuel-saving features, such as brake energy regeneration, help keep carbon dioxide emissions low. Choose between a distinct six-speed manual gearbox and a lightning quick dual-clutch six-speed Powershift automatic.

T6 AWD

237 CO₂ g/km | **10.2** l/100 km | **304** hp | **224** kW | **440** Nm | **Euro 5**

Enjoy the smoothness and dynamics of a supreme in-line six-cylinder petrol engine. The refined 3.0-litre T6 features a twin-scroll turbo for instant exhilaration at all revs – an impressive max torque of 440 Nm is at your disposal even at 2100 revs. This engine is the ultimate in both performance and comfort, while smart technology such as brake energy regeneration adds to high fuel efficiency. For even more sportiness, this engine is mated to Volvo's all-wheel drive with Instant Traction™ and a six-speed Geartronic automatic with sports mode.

T4/T3

T4: 153 CO₂ g/km | **6.6** l/100 km | **180** hp | **132** kW | **240** Nm | **Euro 5**

T3: 139 CO₂ g/km | **6.0** l/100 km | **150** hp | **110** kW | **240** Nm | **Euro 5**

Get more from less. These refined four-cylinder 180 hp and 150 hp 1.6-litre direct-injection petrol turbo engines combine an agile engine character with superior fuel efficiency. The direct fuel-injection technology reduces CO₂ emissions and fuel consumption, while the turbocharger provides this relatively small engine with the power and torque to deal with any driving situation. Low engine weight contributes to crisp handling on winding roads. Volvo's innovative Start/Stop technology (with manual gearbox) and engine brake energy regeneration help you save even more fuel. This is downsizing everything except the fun of driving. These engines come with a six-speed manual gearbox or a dual-clutch six-speed Powershift automatic.

T4F Flexifuel

162* CO₂ g/km | **7.0**** l/100 km | **180** hp | **132** kW | **240** Nm | **Euro 5**

Powered by E85 bioethanol, this new state-of-the-art direct-injection turbocharged 180 hp T4F Flexifuel engine doesn't compromise on performance, comfort or environmental care. When driving on E85, the net contribution of fossil carbon dioxide is considerably lower compared to petrol. As driver, you'll enjoy the same quick engine response and powerful engine character as of the T4 petrol turbo engine. The possibility of filling up with E85, petrol or any mix of those fuels offers superior flexibility. Bioethanol goes in the same fuel tank as petrol. The engine adapts instantly to the fuel mix. Choose between a six-speed manual gearbox and a six-speed Powershift automatic.

* CO₂ emissions when running on petrol. Running on E85 bioethanol, the net contribution of fossil CO₂ is considerably lower.

** Fuel consumption when running on petrol. Running on E85, fuel consumption is about 40% higher due to the less energy content of bioethanol.

D4/D3

D4: 119 CO₂ g/km | **4.5** l/100 km | **163** hp | **120** kW | **400** Nm | **Euro 5**

D3: 119 CO₂ g/km | **4.5** l/100 km | **136** hp | **100** kW | **350** Nm | **Euro 5**

We designed these refined 2.0-litre five-cylinder turbodiesels for a very special reason: to give you a top-notch driving experience in terms of refinement and fuel efficiency. The single turbocharger ensures immense power just above idling. The relaxed character and flexibility of these engines will infuse your drive with the composed feeling of being in control in all situations without compromising on the fun of driving. What's more low fuel consumption, superior mileage and reduced CO₂ emissions are there for you to enjoy. Optimised engine management system together with a range of technical modifications make the D4 and D3 among the most efficient engines in its class. Further enhancing fuel efficiency, the D4 and D3 also feature brake energy regeneration and Volvo's Start/Stop technology. These engines come with a six-speed manual gearbox or a six-speed Geartronic automatic.

D2

119 CO₂ g/km | **4.5** l/100 km | **115** hp | **84** kW | **270** Nm | **Euro 5**

Take advantage of the benefits of supreme fuel economy and ultra-low CO₂ emissions without any trade-offs in comfort, safety or performance. This 115 hp/270 Nm all-aluminium four-cylinder 1.6 litre D2 turbodiesel features advanced Start/Stop technology and brake energy regeneration. Advanced diesel engine technology such as common-rail direct injection, high-precision Piezo injectors and variable turbine geometry provides high torque across the rev range to assure a rewarding driving experience in all conditions. The engine's low weight contributes to low fuel consumption and well-balanced road behaviour. The D2 comes with a six-speed manual gearbox or a dual-clutch six-speed Powershift automatic.

D5 AWD/D5/D4 AWD

D5 AWD: 169 CO₂ g/km | **6.4** l/100 km | **215** hp | **158** kW | **440** Nm | **Euro 5**

D5: 120 CO₂ g/km | **4.6** l/100 km | **215** hp | **158** kW | **420** Nm | **Euro 5**

D4 AWD: 169 CO₂ g/km | **6.4** l/100 km | **163** hp | **120** kW | **420** Nm | **Euro 5**

High demands on refinement and pure efficiency? Volvo's refined high-performance 2.4-litre five-cylinder turbodiesels with fuel-saving brake energy regeneration and Volvo's Start/Stop technology (D5 front-wheel drive with manual gearbox and D4 AWD) may be just for you. Sequential twin turbochargers ensure immense power across the rev range – max torque 440 Nm (D5 AWD and D5 with Geartronic) or 420 Nm (D5 with manual gearbox and D4 AWD) is at your disposal from low revs. There are always ample resources for quick overtaking, especially between 80 and 120 km/h. The smooth engine character contributes to harmonious driving on the open road as well as in the city. And whenever you're in the mood for more sport the 215 hp D5 is ready to play – CO₂-optimised and fine-tuned this hyper-efficient engine only emits a bare 120 g CO₂/km with manual transmission. Choose between a six-speed manual or a six-speed Geartronic automatic with sports mode – and for ultimate dynamics you can add all-wheel drive with Instant Traction™.

Want a dynamic touch?

Be one with your V60. Your body is held firmly yet comfortably in place by the Offblack leather sports seats. The leather-clad steering wheel with Silk Metal inlay and leather-clad gear knob are moulded to fit in your hands. The watch-dial gauges give you instant and vital information. Shimmer Graphite Aluminium centre stack adds to a distinctive air of sportiness. So if stylish and sporty looks set your pulse racing, this may be Volvo V60 for you. Here shown in Black Stone with Sleipner 18" aluminium wheels and accessory endpipes.

Or modern luxury?

Soothe your senses surrounded by sophisticated timeless elegance. Meticulously crafted sports seats upholstered in Soft Beige leather add to an uplifting yet relaxed experience. The leather-clad steering wheel and gear knob are soft to the touch. State-of-the-art supportive technology is within easy reach in the centre stack, featuring authentic Urbane Wood for an unmistakable Scandinavian flair. Elegant from inside and out, this Volvo V60 is painted in Flamenco Red Metallic and features Njord 17" aluminium wheels.

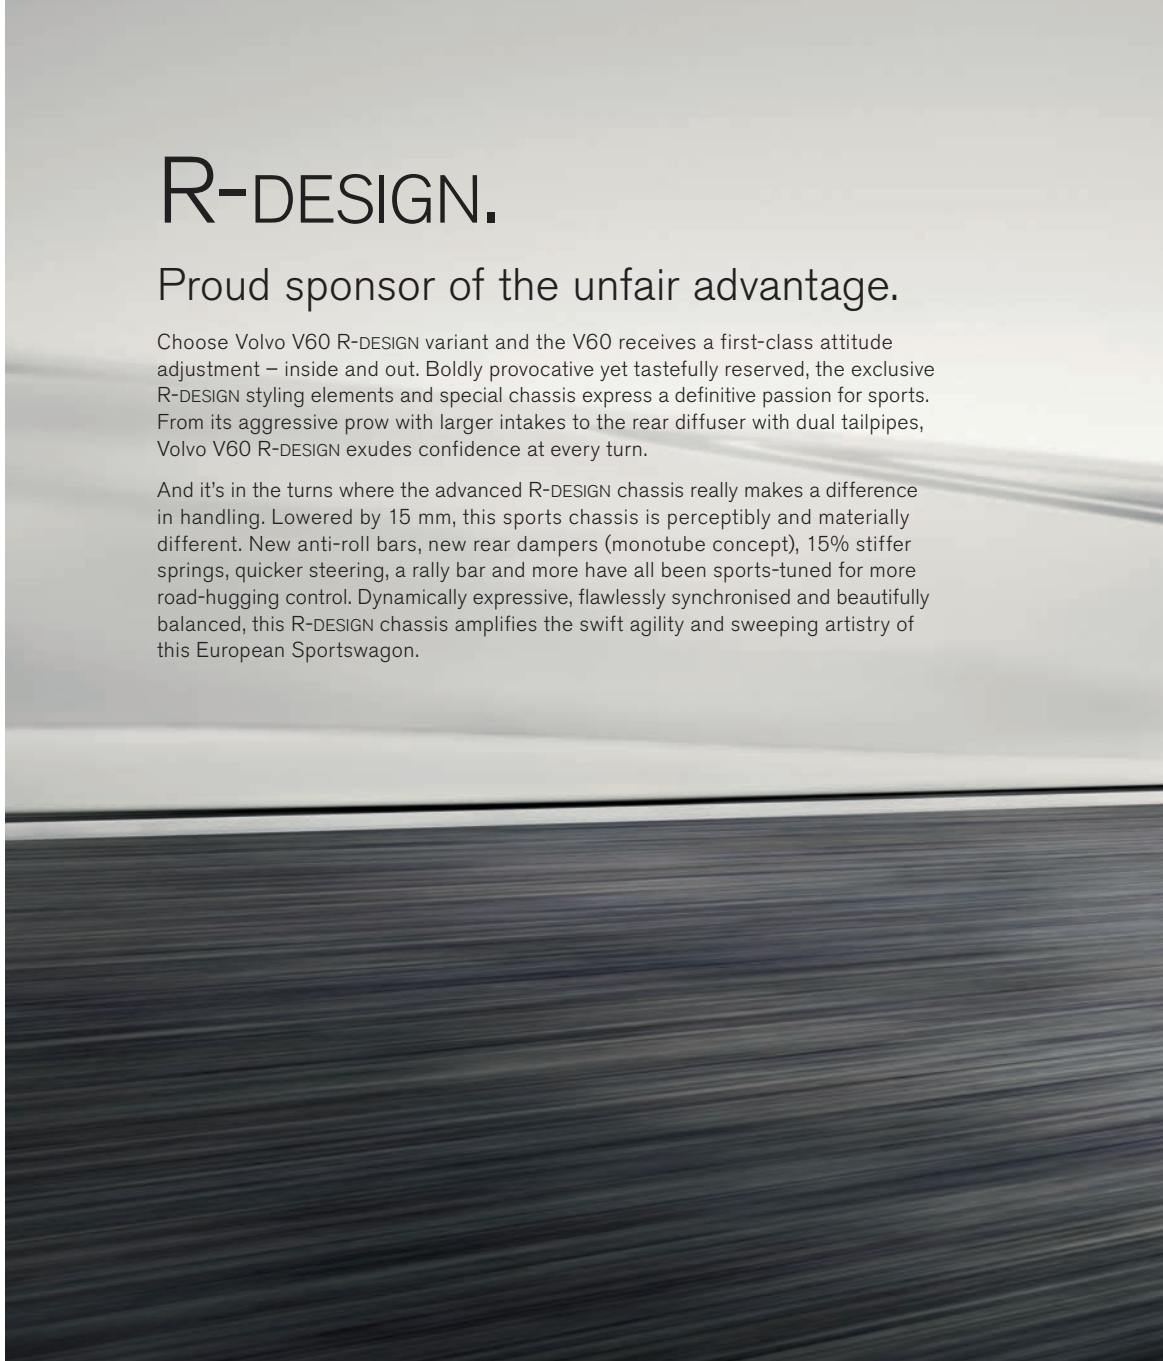

R-DESIGN.

Proud sponsor of the unfair advantage.

Choose Volvo V60 R-DESIGN variant and the V60 receives a first-class attitude adjustment – inside and out. Boldly provocative yet tastefully reserved, the exclusive R-DESIGN styling elements and special chassis express a definitive passion for sports. From its aggressive prow with larger intakes to the rear diffuser with dual tailpipes, Volvo V60 R-DESIGN exudes confidence at every turn.

And it's in the turns where the advanced R-DESIGN chassis really makes a difference in handling. Lowered by 15 mm, this sports chassis is perceptibly and materially different. New anti-roll bars, new rear dampers (monotube concept), 15% stiffer springs, quicker steering, a rally bar and more have all been sports-tuned for more road-hugging control. Dynamically expressive, flawlessly synchronised and beautifully balanced, this R-DESIGN chassis amplifies the swift agility and sweeping artistry of this European Sportswagon.

There are times in life
when you have to turn
up the volume.

The V60 R-DESIGN dials up the physical and emotional dynamics beautifully. Outstanding R-DESIGN elements include the five-spoke Diamond cut Ixion aluminium wheels (18"), specially stitched and embossed R-DESIGN sports seats, and an exclusive leather-clad, 3-spoke steering wheel with a stamped-metal R-DESIGN badge. Blue watch-dial accents also give you a pleasant reminder that you're driving something special every time you check the speedometer and rev counter.

Sports pedals

Racetrack-inspired to enhance the driving experience – enjoy the feel of these ridged sports pedals.

R-DESIGN upholstery

Enjoy unique Flextech/textile/ leather upholstered seats with contrast stitching. Choose Offblack/Offblack or Offblack/ Ceramic Light. Or choose leather upholstery in Offblack with contrast stitching.

R-DESIGN deco inlay

The centre stack's aluminium inlay conveys a contemporary feel, enhances the overall modern Scandinavian design and sets the tone for sports.

Sports floor mats

Exclusive, hand-tufted sports mats with accent ribbing provide a stylish welcome.

Aluminium wheels – accessories

Freja, 8x18",
Diamond cut/Dark Grey Matt
or Light Grey

Fortuna, 8x18",
Glossy Black

It doesn't have to match the drapes.

It's up to you. Add the exterior styling accessories and any preconceptions about what defines pure passion are upgraded here. More assertive than conventional street wear, these exterior styling accents reflect a spirit of independence and a belief in personal freedom. Oh my! What will the neighbours say?

The exterior styling accessories include a front skid plate, a rear skid plate with visible exhaust pipes (single or double pipes depending on your engine specification), side scuff plates, dual front deco frames (all in matt aluminium finish), Diamond cut 18" Freja wheels (in Dark Grey matt or the Light Grey shown here). These assertive details accentuate the road-hungry stance of Volvo V60.

Find your favourite wheels and styling accessories at **www.volvocars.com**

Ymir, 8x18", Silver Bright

Ymir, 8x18", Light Grey

Sleipner, 8x18", Silver Bright

Njord, 8x17", Silver

Balder, 7x17", Silver

Oden, 7x16", Silver

Leather

These leather-faced seats give the Volvo V60 an atmosphere of luxury. It's a hide quality that's smooth and durable – with a coarse grain pattern on the centre panels and a finer grain on the outer panels. Like all Volvo leather, it's organically tanned and ages beautifully.

Tylosand T-Tec/textile

This sporty-looking upholstery combines two materials: finely woven textile upholstery trimmed with ultra-modern T-Tec – a synthetic skin inspired by wet suits and durable outdoor gear.

Mellbystrand textile

A finely woven fabric with a contemporary feel and finish. Centre panels are finely patterned while outer panels are plain.
